

- 1** Veolia's incinerator will pump out dangerous air pollution **24 hours a day, 365 days a year, for 30 years.**¹
- 2** Toxic smoke particulates (PM10, PM2.5 and nanoparticulates) **will penetrate** our lungs and brain, and move into our bloodstream and body organs.^{2,3}
- 3** Incinerator air pollutants can **cause illness and death** from respiratory problems (asthma, lung disease, breathing difficulties), strokes, cancer, heart disease, heart attack and more.^{2,3}
- 4** Plume modelling shows air pollution will spread throughout the region, **from Canberra to Goulburn, Braidwood, Bungendore, Murrumbateman, Gunning, Marulan, Yass, and more.**⁴
- 5** Veolia admits the incinerator **will exceed the NSW Government safety standards** for air emissions.¹
- 6** The NSW Government also has **no safety standards** for emissions during start-up, shut-down, and many other 'non-standard' operating conditions.⁵
- 7** Air pollution causes health problems even when it is below the safety standards.⁶
- 8** Veolia says it is 'safe'.¹ Veolia breaches licence conditions.^{7,8} Veolia's overseas incinerators often exceed safety standards.¹ Veolia has a history of polluting our community.^{7,8} **We can't trust Veolia.**
